

L15 - Business Eco Laptop Bag

Business laptop briefcase made of rPET (equivalent to 15 recycled bottles) in 1680D waterproof fabric.

The bag is equipped with padded compartments to accommodate a 15.6" laptop and/or tablet, as well as an anti-RFID pocket optimizing the security of your personal belongings (credit card, etc.).

It has a hidden "Smart Security" back pocket to store documents. With its non-deformable structure and padded bottom, it offers more protection to the transported belongings.

The bag is equipped with an integrated USB and micro USB socket. By plugging a powerbank (available as an option) into the pocket designed for this purpose, your bag becomes a charging station. You can also add a 3-in-1 lighting cable (as an option) to charge your battery and any device.

Metal handle for a firm and comfortable grip.

A shoulder strap can be added to carry the bag on the shoulder.
