

L20 - Business RPET Trolley Backpack

Convertible business trolley backpack, made of rPET (equivalent to 31 recycled bottles) in a waterproof 1680D fabric.

Non-deformable structure for more protection of transported belongings, with a padded compartment for laptop and tablet, metal handle and removable battery for airport security.

Equipped with an anti-RFID pocket and a TSA padlock which guarantees safe use.

A pocket at the back allows you to uncover the straps to convert the trolley into a backpack.

Equipped with a 10,000 mAh fast-charging battery, the trolley / backpack also comes with a luminous rPET charging cable.

The cable allows the battery to be charged directly from the USB and Android connector outside the bag (without the need to remove the battery).

Everything is included: personalization on the front plate, 10,000 mAh power bank, 3-in-1 rPET cable with personalization on one side and non-woven storage pouch.
