

W22 - Magnetic Charger 15W + 5W

The W22 wireless charger stand has two separate induction outputs to charge several devices simultaneously.

The round part is a magnetic 15W wireless charger. If your phone is compatible, place it on the charger, it will naturally be attached to the support. To take advantage of the 15W charging power, please connect this charger with the supplied cable and to a wall adapter of at least 20W.

The base is built with a USB-C input and output as well as a 5W induction output to charge a earbuds case (AirPods type).

The support is customizable with a light-up logo on the base.

The W22 comes with a USB-C charging cable and a magnetic sticker to ensure compatibility with all phones (device must be induction compatible).

If your phone does not have MagSafe technology (starting iPhone 12), you can stick the sticker to the back of your phone to make it compatible with the magnetic holder.

Everything is included: lighting logo customization, charging cable, magnetic sticker and gift box.
