

L11 - City Backpack

Business city backpack made of recycled PET (equivalent to 22 recycled bottles) in 1680D waterproof fabric.

The backpack is equipped with padded compartments to accommodate a 15.6" laptop and/or tablet.

The bag can be closed thanks to a carabiner at the front, and a secured front pocket. On the right side of the bag, you will find a zip pocket to carry your drinking bottle.

Non-deformable structure and padded bottom for great protection of the bag contents. Features a padded compartment for a laptop or tablet and a metal handle for a firm and comfortable grip.

The bag is equipped with a discreet USB and USB-C plugs (+ micro USB adapter). By plugging a powerbank (available as an option) into the pocket designed for this purpose, your bag becomes a charging station.

Everything is included : printing on front metal plate, non-woven storage pouch and 3-year warranty.
