

L16 - Magpack Backpack

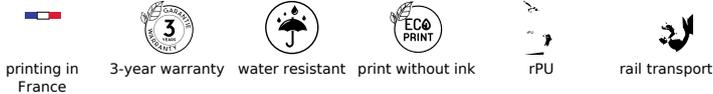

Eco-designed backpack in rPU and rPET (equivalent to 22 recycled bottles).

This backpack combines practicality and durability with padded compartments designed for a laptop or tablet.

It features a USB/Type-C connector with a micro USB adapter: simply plug a powerbank (optional) into the dedicated pocket to turn your bag into a mobile charging station.

The design stands out with a magnetic front flap and waterproof zippers, ensuring both style and security. Its reinforced structure and padded base provide optimal protection for your belongings.

Everything is included: branding on the metal plate at the front, non-woven storage pouch, and a 3-year warranty.
