

L17 - Vacpouch

Innovative compressible pouch with integrated vacuum system

This clever pouch instantly reduces the volume of clothes and accessories thanks to its built-in vacuum system. A simple button under the cap efficiently releases air, compressing the contents in just a few seconds.

When the battery is low, recharge it easily via the USB-C port. A red indicator light shows charging is in progress; once complete, simply unplug and you're ready to go.

Made from durable, waterproof ABS fabric, this pouch combines practicality and strength for everyday use.

Everything is included: customization on the metal plate, storage pouch, and 3-year warranty.
