

A15 - TrackCard

This RFID-blocking cardholder, designed to securely hold up to 7 bank cards, features an integrated tracker compatible with Apple Find My® and Google Find Hub®, allowing the wallet to be located quickly and directly from a smartphone.

Its built-in rechargeable battery supports wireless charging and provides up to 9 months of standby time. The integrated RFID protection helps safeguard personal data stored on contactless cards against unauthorized scanning.

Thanks to its invisible magnetic system, the wallet can be easily attached to compatible smartphones. For phones that are not MagSafe-compatible (models prior to iPhone 12), a magnetic ring is included.

Everything is included: laser engraving and a recycled cardboard gift box with magnetic closure.
