

L30 - RideCase

The RideCase combines the practicality of cabin luggage with the convenience of an electric scooter, offering an innovative mobility solution perfectly suited to modern travellers.

Thanks to its integrated electric drive system and a range of up to 10 km, it allows users to move easily through airports, train stations, trade shows and other professional environments. Once at the destination, the scooter system folds away discreetly, transforming the product into a premium hard-shell suitcase.

Equipped with a removable battery, a USB charging port and a TSA-approved lock, the RideCase offers a complete travel solution for professionals looking for comfort, connectivity and innovation.

UV-DTF customisation on both sides is included.
