

T40 - Portable Air Station

Compact rechargeable air compressor designed for all everyday journeys. Car tyres, bicycles, scooters, motorcycles, sports balls or inflatable accessories: this compressor provides fast, precise and effortless inflation at the touch of a button.

Equipped with a digital display and intelligent preset modes, it allows users to select the desired pressure and stops automatically once the target pressure is reached, ensuring safe and accurate inflation.

Its 3,000mAh rechargeable battery and USB-C port provide complete freedom of use without an external power source. The integrated LED light is ideal for roadside emergencies, night-time use or poorly lit environments.

Everything is included: 1-colour customization, air hose, valve adapters, ball needle, Presta valve adapter, USB-C charging cable, carry bag and recycled cardboard gift box with magnetic closure.
